DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-17 and 25-26, drawn to a portable electronic device comprising a slot to receive a card, classified in class 361, subclass 684.
 - II. Claims 18-19, drawn to a portable electronic device comprising a housing and a slot for a pen, classified in class 361, subclass 686.
 - III. Claims 20-24 and 27, drawn to a portable electronic device comprising a housing and a hand strap mount, classified in class 294, subclass 137.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a portable electronic device comprising a housing and a slot for a pen; and invention III has separate utility such as a portable electronic device comprising a housing and a hand strap mount. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
